

PRELIMINARY AMENDMENT
U.S. Appl. No. -- National Stage of PCT/JP99/03914

A1
fluorine-containing resin coating composition comprising a fluorine-containing resin having a reactive curable group and a curing agent.

A2
10. (Amended) The leather coated with a fluorine-containing resin coating composition of Claim 6, wherein the fluorine-containing resin is a polymer having at least one of chlorotrifluoroethylene unit, tetrafluoroethylene unit, trifluoroethylene unit, hexafluoropropylene unit, vinylidene fluoride unit and vinyl fluoride unit.

A2
11. (Amended) The leather coated with a fluorine-containing resin coating composition of Claim 6, wherein the curing agent is an isocyanate compound, amino resin, acid anhydride, polysilane compound, polyepoxy compound or silane compound having isocyanate group.

12. (Amended) The leather coated with a fluorine-containing resin coating composition of Claim 1, wherein the fluorine-containing resin coating film is formed directly on the leather.

13. (Amended) The leather coated with a fluorine-containing resin coating composition of Claim 1, wherein a primer layer is formed between the leather and the fluorine-containing resin coating film.

A2
15. (Amended) A method of producing the leather coated with the fluorine-containing resin coating composition of Claim 1, which comprises coating the curable fluorine-containing resin coating composition of Claim 6 on the leather surface directly or through a primer layer, and curing.

A2
19. (Amended) The leather coated with a fluorine-containing resin coating composition of Claim 1, which is used for interior goods of building, interior goods of vehicles, furniture, shoes, bags, clothes and small leather articles.
